

Your partner for  
industrial production.  
**HEIDELBERG Industry.**

# Customized solutions. Production with system.

**Are you looking for a reliable partner with expertise in mechanical engineering for industrialization and production? HEIDELBERG® Industry produces your products in the best quality, with the know-how and precision of an established technology company.**

**Use all our expertise.**

From development via prototype construction to series production, service, and spare parts supply, HEIDELBERG Industry offers you comprehensive support - for optimal process and production solutions, including process support, advice, and project and change management.

---

## **All-round carefree in a complete package. HEIDELBERG Industry.**

As an external technology partner, we bring your products to a higher level using our specific know-how from different areas. We stand for convincing solutions that make your company more competitive and profitable.

Our offering expands with your requirements. Whether prototypes, individual parts, individual components, customer-specific manufacturing solutions, mechanical or electronic components, assemblies or systems: With our customized service packages, you'll get exactly the solution you need.

But not only that. Everything is backed by the extensive experience and expertise of HEIDELBERG, the global market leader in printing presses. Together, let's make your products even better. Rely on HEIDELBERG Industry.

# PORTFOLIO

## Exactly what you need. Focus on your products.

At HEIDELBERG Industry, the focus is on customer needs. Our comprehensive portfolio enables us to put together a perfect package for you, regardless of the size and goals of your company. All the services of the HEIDELBERG Group are available to you, which means well-established, tried-and-tested processes, short communication channels, and high cost-efficiency.

**Your benefits. The choice is yours.**

- You can choose from our comprehensive portfolio of services and machines for industrial production.
- You will benefit from our equipment as well as our unique know-how.
- You will get products that meet the highest quality standards.
- You will save time thanks to short communication channels and delivery times.
- You will achieve an optimal price-performance ratio with high cost-efficiency.

**Bundled benefits. Our competencies and power modules:**

**Foundry**  
One of the most efficient foundries in Europe with a focus on gray and nodular cast iron.

---

**Production**  
The perfect solution for every task - from the production of individual parts to customer-specific production solutions.

---

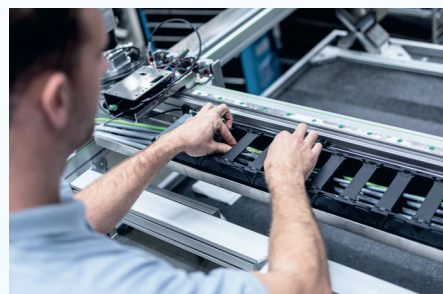

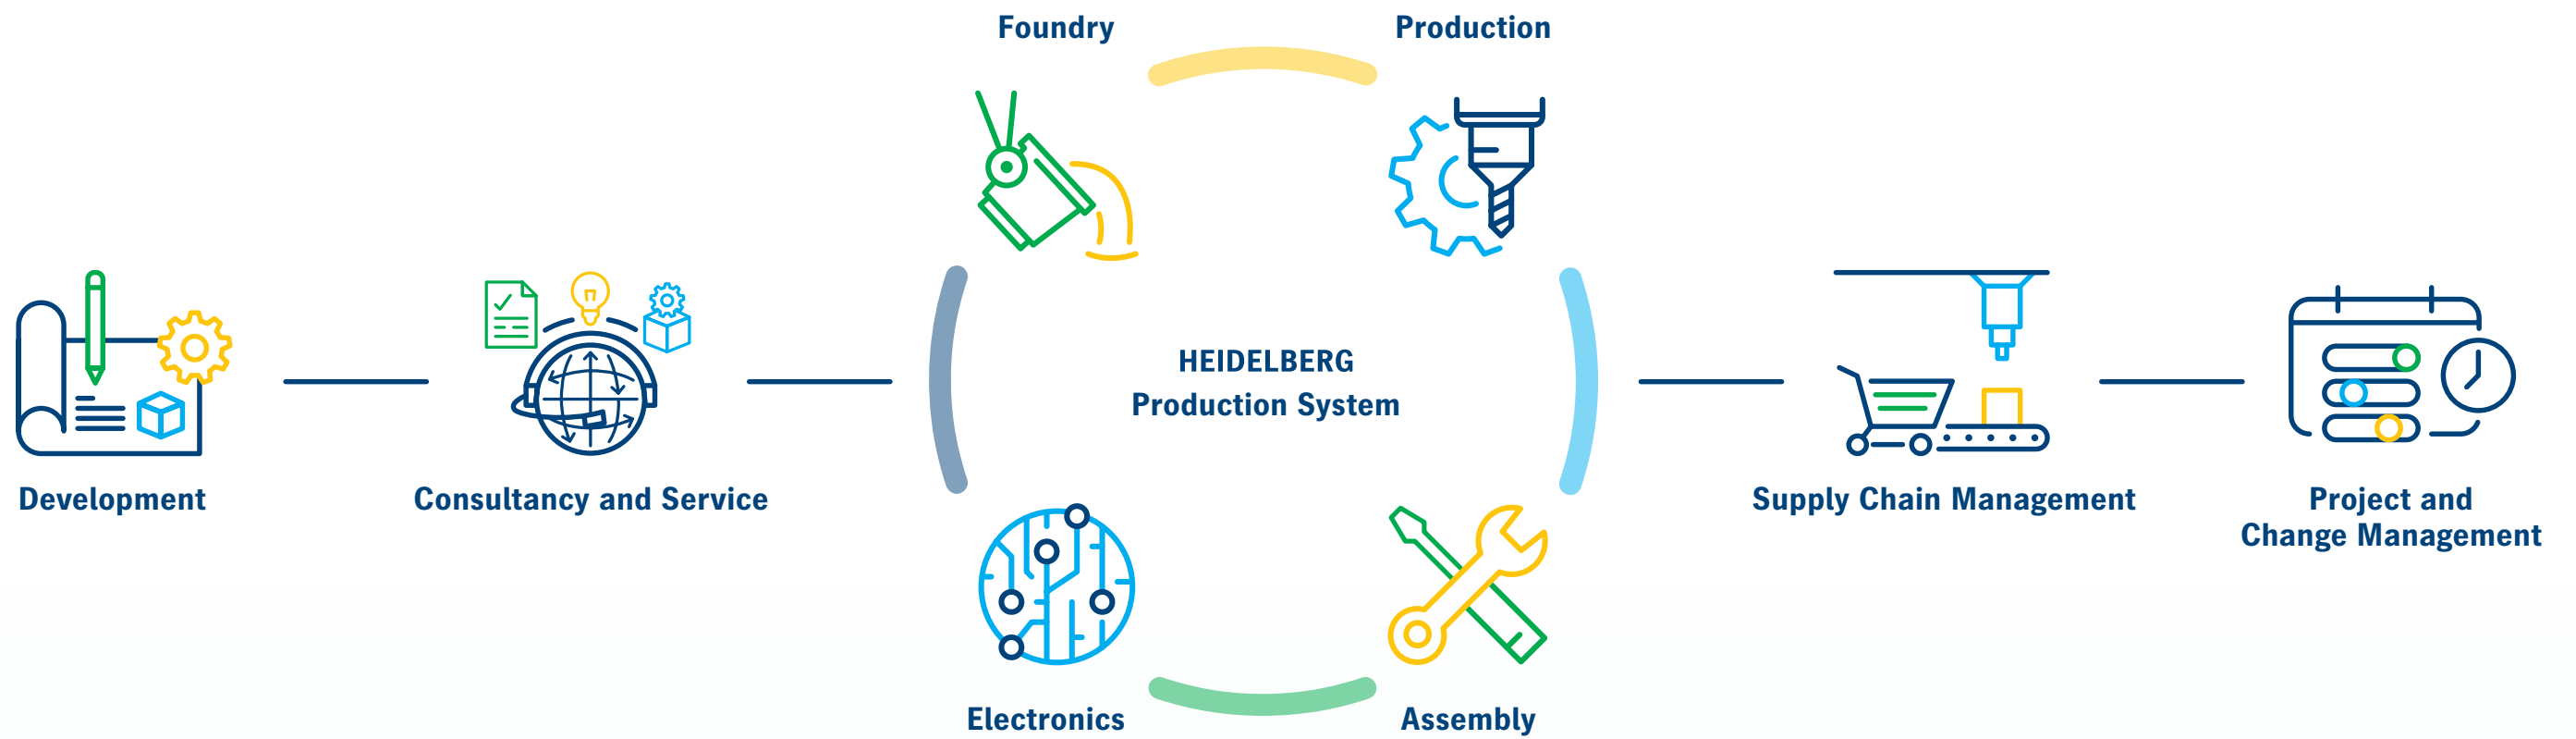

**Assembly**  
Assembly of complex mechanical products and devices, including electronic components, and optimization of all production processes.

---

**Electronics**  
Development and production of control systems and power electronics according to individual customer specifications.

# HEIDELBERG INDUSTRY

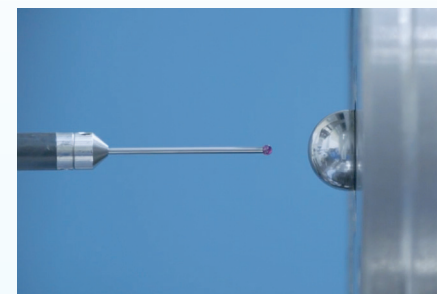

**Our promise.**  
We produce OEM products of the highest quality with the know-how and experience of an established technology company.

**Expertise and knowledge.**  
Whether development, consulting and service or supply chain management - we offer you optimal solutions, including project and change management.

**Established network.**  
Benefit from accompanying services such as technology and purchasing advice, supplier management as well as storage and logistics.

**Certified quality.**  
Ensure the quality of your products by making targeted use of our equipment and expert knowledge as well as our certified processes.

**Scalable processes.**  
Get standardized and scalable production processes as required and use the entire range of production technologies.

**HEIDELBERG production system.**  
Rely on efficient knowledge transfer and forward-looking solutions for questions about digital transformation and climate neutrality.

# 1

## Foundry

**The perfect shape.** From engineering via model and prototype construction to series production - with our extensive experience and perfectly coordinated production processes, we manufacture sophisticated castings in all sizes.

As a multi-certified production company, the implementation of all your quality requirements is a given for us. We ensure this through metallurgical, dimensional, and physical tests.

### High-precision metal casting.

#### Competence and experience that pays off.

- Production of sophisticated castings, organized by modern project management
- Casting technology consulting with CAD systems
- Component development using simulation tools
- Own model construction
- Prototyping
- HEIDELBERG quality. Made in Amstetten

# 2

## Production

**Tailor-made solutions.** We provide you with the mechanical components that meet your requirements exactly.

The main technologies of turning, milling, and grinding are supplemented at HEIDELBERG by induction hardening, friction welding, straightening, and hardening. We use our qualified pool of suppliers for surface treatments. Process reliability, flexibility, high customer orientation, and professional quality management are our day-to-day business.

### High-quality series production.

#### Welcome to the production island.

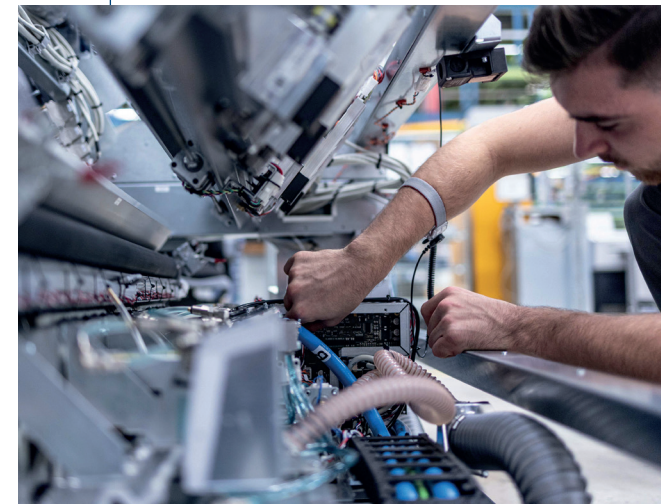

- Ensuring series production
- High-volume series production, on demand
- Individually configurable module systems and service packages, optimal technology
- Project and order-related production solutions
- Flexibility and production reliability
- Reliable delivery and supply of blanks
- HEIDELBERG quality. Made in Brandenburg

# 3

## Assembly

**Implementing ideas.** We advise and accompany you throughout the entire product life cycle.

Benefit from our entire range of services - from engineering and comprehensive technological advice in the early project phase to the development and industrialization of products and devices.

### Ensuring series production.

#### Customized industrial solutions.

- Efficient supply chain management.
- Industrialization of products and processes
- Prototype construction
- Digital assembly planning and standardization
- Procurement management / Supplier qualification
- Own electronic system and electrical control cabinet production
- Climate-neutral assembly
- Service and spare parts management
- Quality assurance / employee training
- Work preparation, change management
- Logistics and packaging

# 4

## Electronics

**High-performance components.** We develop customized control and power electronics, implement your printed circuit boards, and build complete devices and systems.

From the first concept study via prototypes to series production - we look at the entire process step by step and optimize costs and quality.

### Finely tuned electronic system.

#### From idea to product.

- Development for your application
- Industry and automotive standards
- Modern project facilities
- Printed circuit board assembly
- Module and device construction
- Electrical control cabinet construction
- JIT/JIS logistics connection to the customer
- Highest quality level
- Excellent customer reviews

# Collaboration that matters. Partnership that pays off.

**Benefit from a combination of the best services.  
Increase the added value of your products with external  
production by HEIDELBERG Industry.**

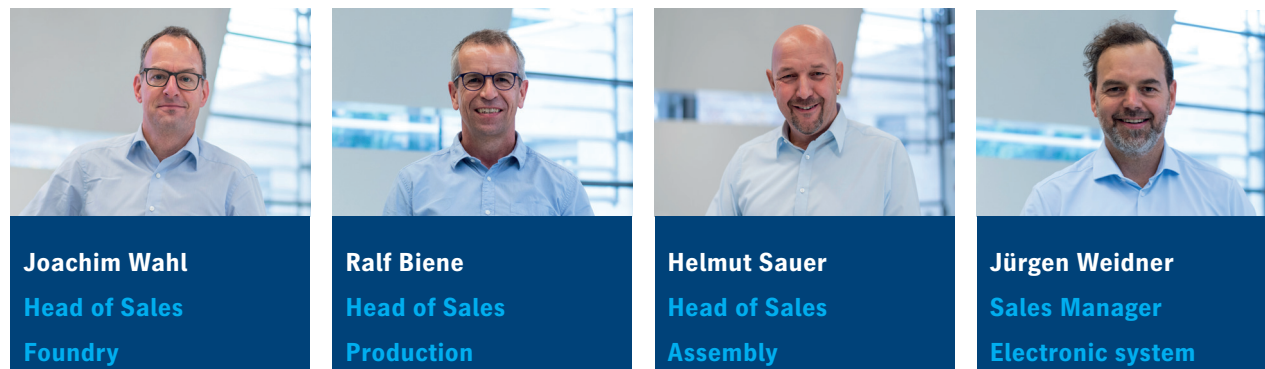

**Your requirements. Our solutions.**

External production is often a wise decision from a business point of view. It reduces vertical integration, reduces necessary investments and fixed costs, and can optimize the expenditure structure in the long term. With the right partner at your side, external production becomes a model for success. This is exactly why you are at the right place with HEIDELBERG Industry.

Not only do we produce your products according to the highest industrial standards in the best quality, but as part of your supply chain, we are always close by with our locations in Germany and long-standing supply relationships. We open up the entire world of industrial production to you, including digitization, consulting, documentation, and universal interfaces - without any risks for you.

With HEIDELBERG Industry, you win several times over. We offer you access to complex solutions and innovatively manufactured series production and support you as your partner - at any time and according to your requirements.
