

The unique.
Speedmaster CX 92.

Hugely efficient.

Speedmaster CX 92.

The Speedmaster® CX 92 is tailor-made for commercial print jobs in DIN format. It therefore offers you a solution with the best possible price/performance ratio, for the cost-effective production of brochures, catalogs and flyers.

Gain an advantage over the competition. Benefit from 20 percent cheaper printing plates than the 70 × 100 cm (27.56 × 39.37 in) format.

Boasting established HEIDELBERG® technology and the new operating concept, the Speedmaster CX 92 offers value retention, quality, and ease of use. This applies to effective printing as well as high-quality finishing with the new innovative coating unit. It offers high productivity for processing a wide range of substrates, with printing speeds of up to 16,500 sheets an hour and is therefore also ideal for packaging printing. The use of LED dryers enables fast finishing and an extended range of applications. Further features are its simple, intuitive operation, integration in the Prinect® workflow and the Prinect Easy Control spectrophotometric color measurement system.

And: each Speedmaster CX 92 is backed up by the comprehensive service offering from HEIDELBERG. This enables you to get the most from your printing press at all times thanks to maintenance, remote functions, perfectly coordinated consumables, and an international service and spare parts network.

Count on the Speedmaster CX 92. On a secure investment in top results and a future-proof machine.

Outstanding characteristics. The facts at a glance.

Highlights:

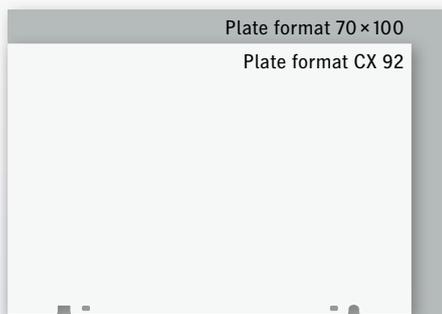

- The HEIDELBERG User Experience on the Speedmaster with the Prinect Press Center® XL 3 sets new standards for the user experience at the press. The unique navigation through Intellistart® 3 and the assistance systems of the Speedmaster Operating System ensure predictable results and improved performance
- Preset Plus feeder and delivery for a hugely diverse range of substrates and precise formation of piles up to 1.3 meters high
- Color measurement systems such as Prinect Easy Control, Prinect® Axis Control® and Prinect Inpress Control® 3 for reliable, standardized print production
- AirTransfer system for contact-free, gentle sheet transport on an air cushion
- Alcolor® dampening unit with Vario function prevents hickeys and stabilizes the ink-water-balance for print quality that impresses your customers
- Stable print quality at a maximum printing speed of up to 16,500 sheets an hour
- Innovative coating unit with exceptional operating convenience for highest finishing demands
- Attractive price/performance ratio thanks to demand-focused equipment
- 20 percent lower plate costs than the 70 × 100 cm (27.56 × 39.37 in) format
- A secure investment with modifications and innovations of the Speedmaster CX 104
- Ergonomic design for maximum safety at work and ease of use
- All the advantages of UV printing thanks to modern UV dryer systems
- Highly efficient ink mist extractor for improved printing and working conditions

High performance made easy. The Speedmaster CX 92 flexibly prints a variety of imposition layouts in 92 format. Designed as a future-proof investment offering top quality and short makeready times, it cost effectively covers a wide range of commercial print jobs.

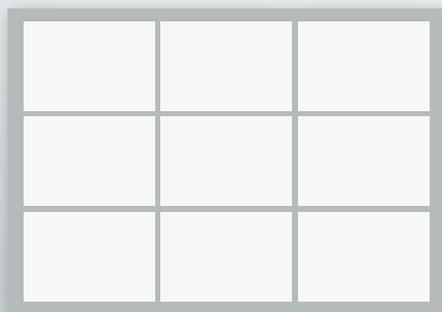

Printing plate cost savings:

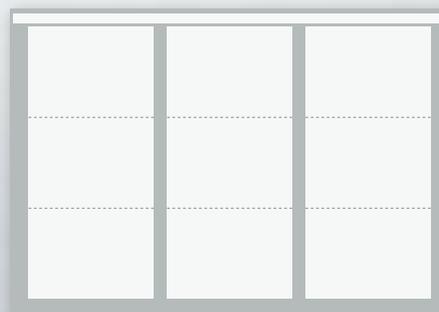

Possible imposition layouts:

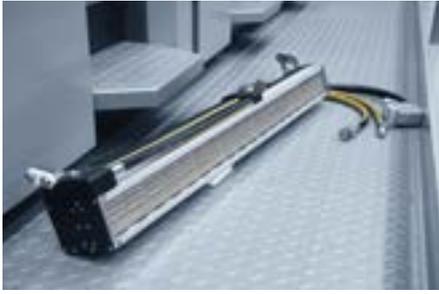

Traditional 16-pager, A4, portrait

Nine repeats; A4, landscape

Three 6-pagers with fold lines; A4, landscape

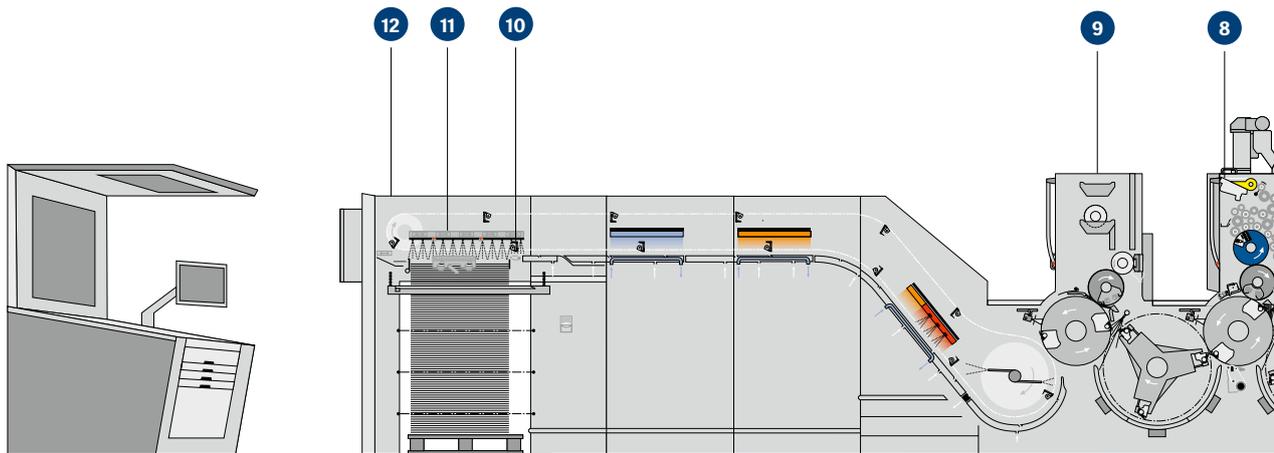

UV preparation for the use of LED dryers enables fast postpress and an extended range of applications.

The new, innovative Speedmaster CX 92 coating unit combines high finishing demands with exceptional operating convenience.

Fast ink changes thanks to ink fountain liner.

Speedmaster CX 92-4+L. The press shown is a sample configuration. Some of the equipment features mentioned are optional.

1 Feeder

- The Preset Plus feeder is designed for piles up to 1.3 meters high. With preset air settings and material-dependent speed compensation, it separates a large variety of substrates with great precision.

2 Sheet alignment

- Precise sheet alignment is ensured by accurate, remote setting of front lays, automated sheet arrival control and sheet slowdown feature.

3 Monitoring

- Sheet monitoring by sensors and two self-calibrating double-sheet detectors support continuous production.

4 Printing unit

- Reduced maintenance thanks to cylinder surfaces with a high-quality finish, and special gripper systems. Central remote register adjustment shortens setup times.

5 AutoPlate Pro

- AutoPlate Pro enables fully automatic, staggered plate changes in the shortest possible time.

6 AirTransfer system

- The AirTransfer system with Venturi nozzles guarantees contact-free, stable sheet transport over the entire printed stock range of substrates 0.03 to 1.0 mm thick.

7 Inking unit and film dampening system

- The speed-compensated Alcolor film dampening unit with Vario function ensures a stable ink-water balance and prevents hickeys. The inking unit with high storage capacity promises stable coloring over the entire production run.

8 Ink fountain

- The calibration-free ink fountain with 500 increments per color zone achieves stable quality and can be cleaned quickly and easily.

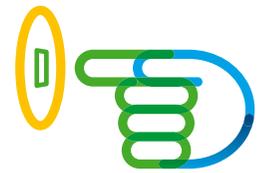

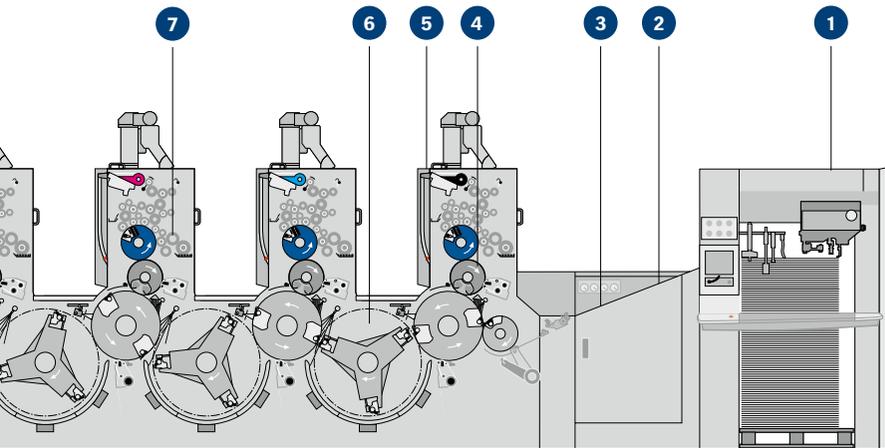

The inking unit and dampening system ensure a stable ink-water balance without hickeys, and therefore uniformly constant coloring over the entire production run.

AirTransfer system for contact-free sheet transport on an air cushion, without marks or scratches.

Feed table with central suction belt for precise sheet separation with a varied range of substrates.

Push to Stop.
The key to the smart print shop.

9 Coating unit

- Innovative coating unit with a high-quality chamber blade system and unique quick-change system for screen rollers and blades. Simple change of coating blanket and plate. Homogeneous coating application with a high degree of gloss thanks to Saphira® anilox rollers, manufactured in-house using the patented PLP pulse laser process.

10 Sheet brake

- The pre-adjustable, dynamic sheet brake slows the sheet automatically, safely and in a controlled manner.

11 StaticStar®

- Antistatic equipment minimizes electrostatic charging of sheets and enables uniform sheet separation and stable sheet travel, even with static materials.

12 Delivery

- The Preset Plus delivery with intuitive navigation via touchscreen and jogwheel creates ideal conditions for the second print run or finishing thanks to precise pile formation.

+ Prinect Press Center XL 3

- Prinect Press Center 3 control station with intuitive operator guidance system Intellistart 3 for fast and process-oriented setup and user-friendly operation.

+ Maintenance

- Fully automated central lubrication of the entire machine on the drive and operator sides considerably cuts maintenance times.

Leader in the printing process.

10 clear benefits.

Makeready

Savings of

up to 100 hours

per year – selection of the most suitable washing program by the Wash Assistant.

5 minutes saving per ink change and printing unit – instead of five or even ten minutes of cleaning, each ink fountain is cleaned in just one or two minutes.

60 minutes faster in postpress thanks to freely positioned sheet brakes and Venturi sheet guidance for faster work-and-turn.

OEE

Improvement of overall equipment effectiveness – navigated printing reduces process- and operator-dependent downtimes.

Productivity

Increased productivity thanks to production speeds of up to

16.500
sheets per hour.

20% lower plate costs with the 92 format.

Preset Plus feeder with central suction belt, automatic sheet travel correction and arrival control for **perfect sheet travel** and **uninterrupted production**.

User-friendliness

70%

fewer operating steps per job change thanks to Intellistart 3.

Just

2 clicks

to select and release jobs for printing.

Roller settings are checked in just **5 minutes** and **20 minutes** are saved per adjustment cycle with the Roller Check Assistant.
